Package 'RLogicalOps'

July 21, 2025

Type Package

Title Process Logical Operations

Version 0.1

Date 2016-02-06

Author Sunny Kumar <sunny.nitie14@gmail.com>

Maintainer Sunny Kumar <sunny.nitie14@gmail.com>

Description Processing logical operations such as AND/OR/NOT operations
dynamically. It also handles nesting in the operations.

processLogiOper *Processing Logical Operations*

Description

Dynamically process the logical operations over a list of string and get the result

Usage

```
processLogiOper(logicalOperation, stringList)
```

Arguments

`logicalOperation`
> A String containing the logical operation to be performed

`stringList`   A list of String over which the logical operation is to be performed

Value

A list of the output values(0/1)

Examples

```
logicalOperation <- "AND(Cake,OR(Birthday,Anniversary))"
stringList <- c("The cake at the birthday was awesome."
               ,"Their anniversary was last week.")

processLogiOper(logicalOperation, stringList)
```
