
TIA COMMITTEE TR-45 MOBILE & PERSONAL COMMUNICATIONS STANDARDS (TR-45)

TITLE: Liaison statement to TIA TR-45 on Harmonized Packet Data Intercept Standards

ABSTRACT: ETSI and 3GPP are currently completing a series of GPRS Packet Data Intercept standards for 2.5G and 3G mobile systems. The ETSI SMG10 WPD/3GPP SA3 Joint Working Group on Lawful Intercept proposes harmonized packet data intercept standards with TR-45, T1P1 and 3GPP2. WPD is interested in co-operating with TR-45 towards this goal. There is the potential here to have a single TIA/T1P1/3GPP2/ETSI/3GPP method and format for intercepting packet data service in mobile networks. Such a result would have obvious economy of scale benefits to manufacturers and service providers. The accompanying documents, ETSI TS 101 509 and 3GPP TS 33.107 are the latest version of these packet data intercept specifications. Please review these standards as part of your own packet data standard work. Also let us know of your interest in developing a harmonized set of packet data standards.

Bernie McKibben, Chair of the ETSI SMG10 WPD/3GPP SA3 Joint Working Group on Lawful Intercept
